Coating & Finishing

Final Quality Inspection

## MANUFACTURING

- Manufacturing is supported by a well-established production facility in Dongguan, equipped with advanced systems and experienced technical teams
- End-to-end production capability, from mold development to final finishing, ensuring precision, consistency, and efficiency
- Structured production management ensures stable quality, reliable output, and on-time delivery for global clients

## FAQ

- Do you offer ODM and OEM services?

We provide comprehensive ODM and OEM solutions, including product design, development, and full-scale production.

- What materials do you work with?

We specialize in resin and have strong capabilities in multi-material integration, including glass and metal.

- How do you ensure quality?

Quality is managed through a structured control system covering all stages of production, ensuring consistency and durability.

- What is your production lead time?

Lead time is 30–50 days after sample approval. Reorders are faster

- What is your MOQ?

Standard: 400–500 pcs. Complex designs may require a higher quantity.
